

During today's seminar we listened to Sheryl Awe. Sheryl Awe is an Artificial Intelligence Engineering Manager and the title of the talk was Computing at HPE. Sheryl Awe is a Texas A&M Alumni (Class of 1989) . During this session Sheryl Awe talked about her educational background, HPE, HPE's social impact, and what it's like working at HPE (including types of software engineering jobs). She joined Compaq in 1990. In 2002, HP acquired Compaq. Later in 2015, HP split into HP Inc and HPE. In 2019, HPE acquired Cray supercomputers. By working at HPE you will stay healthy, save money & time, and do stuff you love. You can stay healthy by taking advantage of the virtual doctor visits, comprehensive care navigation platform, confidential counseling, guided meditation , virtual physical therapy , and fitness centers offered. You can save money by the generous 401(k) company match, financial planning with EY, up to \$9000 of student loans repaid, and health savings account. Some of the things sheryl awe enjoyed attending were wellness fridays , 60 paid hours of volunteer time off, exclusive discounts, charitable contribution matching, and an extraordinary leave policy. In the future, I would like to help develop HPE products. A question I had for the speaker how the internal mobility of the company is.
